DETAILED ACTION

Allowable Subject Matter

1. Claim 1-48 are allowed.

2. The present invention is directed to a method for flow control based on the available space in the shared buffer. The prior arts in the record fail to teach or make obvious to a method comprising monitoring the remaining available buffer space of the shared buffer, estimating the expected total content of the links, calculating the free margin as the remaining available buffer space of the shared buffer minus the expected total content of the links, comparing the free margin to thresholds and controlling a selected links based on the comparison within a structure of the claim. These features are claimed in the independent claims 1, 18-20, 25 and 42-44 and render them allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clemence Han whose telephone number is (571) 272-3158. The examiner can normally be reached on Monday-Thursday 7 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh Fan can be reached on (571) 272-3042. The fax
